H. F. FALCONER, Undertaker, Barrack Street, PERTH.

CROPS AND STOCK.

Most of the European grains, fruits and vegetables can be cultivated and brought to a high state of perfection in the Southern part of the Colony. The soil in parts is sandy, but this sand when irrigated is highly productive. There is a large extent of light friable soil suitable for all kinds of crops. The climate, as regards agriculture, is favourable, although at times subject to bad seasons. The shortest day is in June, and midsummer comes in December; with August commences the Spring, and the winter begins in April.

Sheep, horses and cattle thrive well throughout the Colony, more especially in the Northern parts, where the pasturage is extensive and very nourishing.

IMMIGRATION.

The Board of Immigration grant assisted passages to Western Australia to nominated immigrants. Nomination forms are obtainable at the office of the Honorable the Colonial Secretary in Perth.

Assisted passages are at present only allowed to farmers, agriculturists, millers, wheelwrights and others likely to be useful in country districts, all of whom must be possessed of some small capital. The amount required in each case is decided by the Agent General, and must be deposited with him. As a rule a single man is required to deposit not less than £100.
