

## PREFACE.

Separate Medical, Ecclesiastical, Legal, Educational, Banking, Insurance, Mining, Pastoral and Agricultural, Local Government, Customs, Official, and Postal and Telegraphic Directories are given, making the work comprehensive and complete.

In conclusion, the Publishers hope that the present edition will be found to have fully maintained the reputation of the Western Australia Post Office Directory, and thus ensure a continued support for the next issue, which will be ready in February, 1900.

MESSRS. ALFRED LAWRENCE & CO.,  
MELBOURNE.

Dear Sirs,

I am using your Spring Water Crystals (Griefendorffs) for making my Soda Water. I find, after careful experiment, that by adding about 8 ozs. of the Crystals to each 50 gallons of filtered water, stirring well up, and passing the water *immediately* through the carbonating cylinder, the result is a magnificent *brilliant* Soda Water, practically identical with the famous natural waters from the Spas and Springs of England.

When using your Crystals it is not necessary to bottle at so high a pressure as is usual (1 bottle at 80 lbs. only), consequently the breakage of bottles is much minimised, and a *far and away* superior Soda Water produced.

I strongly recommend all aerated water makers to use these Crystals for *all* their aerated drinks; they will find the use of them gives no flavour but imparts a distinctly high character, especially to the Soda Water, which, practically is converted at once into a high-class natural water, such as Schweppe's.

Yours faithfully,

A. CRICHTON,  
Manager.
