The Department reserves to itself the right of refusing to make an Assay of any sample sent

With the object of encouraging *bona fide* prospecting, free assays will be made, on conditions which can be ascertained on application at the offices of the Government Geologist.

**FREE ASSAYS.**

With the object of encouraging *bona fide* prospecting, the Honorable Minister for Mines has authorised free assays to be made by the Geological Survey under the following conditions—

1. The sample must have been obtained from Crown Lands within the Colony not held under Mineral Lease
2. The exact locality where the sample was found must be furnished
3. The sample must be of sufficient promise in the eyes of the Government Geologist to warrant an assay being made at the Government expense
4. Assays will not be made of samples showing free gold or consisting of unmineralised quartz, which can easily be tested by the prospector himself by crushing & washing in a pan

Under no circumstances will free assays be made of tailings or other metallurgical products, or for the purpose of checking the work of private assayers

6. The Geological Survey further reserves to itself the right of refusing to make any particular assay, and also the right of publishing at any time the results of an assay made at the public expense
