

ERICKSON, Frederica (Rica) Lucy, nee SANDILANDS, 1908-2009

Dr Rica Erickson was one of Western Australia's renowned historians and authors. Born in 1908, she was educated in the Goldfields and trained as a teacher. She married Sydney Erickson, a farmer, in 1936 and raised four children. From 1951, Dr Erickson published four books on botany, she later wrote historical biographies. Her greatest undertaking, however, was the monumental five volume "Dictionary of Western Australians 1829-1914". Dr Erickson was awarded the OAM (1987) she was also made an honorary Doctor of Literature, University of Western Australia, and in the same year, (1980) was named West Australian Citizen of the Year. An orchid genus, *Ericksonella*, was named in her honour (2004).

SUMMARY OF CLASSES

BOTANICAL ARTWORKS

'd' denotes details additional to the main painting—mainly enlarged floral and other features. The date is that of painting; '-' denotes a missing part, e.g. -.ix.58 = Sept. 1958. [type specimen] indicates specimens used for the first botanical description of a new species. Most paintings are on sheets c. 20×30 cm. All are unframed. Many paintings were used as the basis for a published colour plate (apparently re-drawn for this purpose), and others for line drawings. These are annotated 'pub.'

Acc. No.	DIGITAL	DESCRIPTION
