

OLDHAM, JOHN AND RAY

John Oldham (1907-1999) was a landscape architect in Western Australia. Oldham was a pioneer of landscape architecture in Australia, and together with his journalist wife Ray (1911-2005) (nee McClintock) were founding members of the National Trust (WA) and were prominent in the fight to save some of WA's iconic buildings during the 1960s and 1970s. They married in 1936. They moved to Sydney joining the architectural firm of Stephenson and Turner, and in 1939, Oldham was given the task of designing the Australian Pavilion for the 1939 New York World's Fair.

Oldham was appointed WA's first Government landscape architect in the 1950s. Among his many achievements were the landscaping of the Narrows Interchange, Parliament House, Sir Charles Gairdner Hospital, Serpentine and Wellington Dams, Western Australian Institute of Technology and developing a master plan for Kings Park and the Swan River foreshores.

Internationally renowned as a landscape architect, Oldham was awarded an Order of Australia in 1989. Ray Oldham wrote for the *West Australian* and the *Sunday Times*. Jane Scott was a pseudonym she used.
